DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection. It should be noted that the basic reference used to reject the claims was made of record in the previous office action. Any amendments to claims made in response to this office action should be made upon review of all of the references of record.

Claim Objections

Claim 43 is objected to because of the following informalities: in line 2, shouldn't 'change' be changed to --charge--? Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6,7,10,17,18,44 are rejected under 35 U.S.C. 102(b) as being anticipated by Perfido et al. Figure 1 shows a process for recovering crumb rubber including fiber removal step 5, metal removal step 6, cryogenic cooling 7, grinding 8, and separation 9.

Claim Rejections - 35 USC § 103

Claims 4,5,8,9,11-16,20-43,45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perfido et al. The remaining limitations of these claims would have been obvious design choices only as they solve no stated problems. For example, varying speed of grinding members is well known in the art to control particle size and of no patentable merit. If applicant believes that patentable subject matter is found in these claims, the patentable subject matter should be specifically referred to in arguing the rejection.
